Chain-of-custody policy

The Management of Transpack S.p.a. has decided to guarantee its customers the production of wood and heavy cardboard packaging made from PEFC™ (Programme for Endorsement of Forest Certification schemes) and FSC® (Forest Stewardship Council) materials by implementing and maintaining a chain of custody management system for the use of wood raw materials that come from environmentally, socially and economically sustainable management.

In this context Transpack S.p.a., certified according to the Chain of Custody Standard (Coe) FSC® and PEFC™, wanted to offer its customers a guarantee of the origin of the raw material used for its products and thus demonstrate in a correct, transparent and controlled manner its active contribution to responsible forest management, in compliance with the rigorous environmental, social and economic standards of the FSC® and PEFC™ Forest Certification Scheme recognised worldwide.

This document describes the Coe Certification Policy adopted by Transpack S.p.a. and takes concrete form in the assumption and pursuit of the following commitments and objectives:

- ❖ Comply with the Coe, social, health, safety and workers' rights requirements defined in the FSC® and PEFC™ standards provided for by the current and binding laws of the Italian state.
- ❖ Constantly verify that it is not directly or indirectly involved and extraneous:
 - to illegal logging or illegal trade in timber or forestry products derived therefrom;
 - to any forest use practice that may harm the rights and “tradition”, understood as the set of customs and related values, of every human being;
 - any forest use practice that may destroy areas and environments of high conservation value, the environment and biodiversity in general;
 - any practice of significant conversion of forest areas and environments to plantations or other non-forest uses;
 - the introduction of genetically modified organisms in forestry operations;
 - violation of the ILO convention as defined in the 1998 Declaration on Fundamental Principles of the Right to Work.
- ❖ Check the certification of raw materials (board, wood and plywood sheets) purchased and their suppliers;
- ❖ Choose suppliers that operate in compliance with the specifications defined by Transpack S.p.a.;
- ❖ Train and raise the awareness of personnel directly involved in the Chain of Custody System and in particular personnel involved in procurement management;
- ❖ Suspend the application of sales as FSC® and PEFC™ if the product does not meet the requirements of the standard applicable to the company as defined in the Chain of Custody Manual;

- ❖ Use the FSC® and PEFC™ logos only in association with products that have the minimum characteristics required by their respective standards.
- ❖ Guarantee compliance with the "Fundamental Labour Rights" requirements set out in the FSC® and PEFC™ standards:
 - Transpack S.p.a. has no underage personnel in its workforce, but only overage and qualified personnel selected for their professional skills;
 - at Transpack S.p.a., working relations with all employees are voluntary and based on mutual consent, without any form of direct or indirect threat from the employer on staff. All working conditions are reported in the employment contract (Ref. CCNL LEGNO INDUSTRIA) that is signed by the employee, at the moment of hiring, for his spontaneous and conscious acceptance. Transpack S.p.a. has never been involved in lawsuits or litigations or settlements for conduct involving physical or sexual violence, bonded labour, withholding of wages/including payment of employment taxes and or payment of a deposit to start work, restriction on mobility/movement, withholding of passports and identity documents, threats of reporting to the authorities;
 - Transpack S.p.a. is against any ideology and behaviour of discrimination related to gender, race and age, in fact it guarantees equality in hiring and firing, promotion and workload distribution;
 - Transpack S.p.a. guarantees the freedom of association of its workers understood as the free exercise of the right to join legally recognised trade unions and the free exercise of trade union activities.

As far as the company's traceability system is concerned, it is a precise company choice to establish, promote and disseminate an FSC® and PEFC™ Traceability Control System aimed at achieving the objectives set out above, assigning each company function the task of guaranteeing the traceability of the final product, controlling the correct and effective application of processes and the achievement of product objectives.

This mechanism is verified by means of process records made by company personnel involved in controlling the traceability system.

The Management of Transpack S.p.a. has designated the Chain of Custody Managers as the contact persons for the implementation of this policy.

Transpack S.p.a. undertakes to disseminate these principles at every level within its organisation, to its customers/suppliers and to its stakeholders, understood as all parties interested in and involved in the activities of Transpack S.p.a., by means of training courses, promotion and communication activities within the framework of the chain of custody policy.
